BENEFITS & QUESTIONS ABOUT SOLAR

1. **FINANCIAL BENEFITS**
Solr Helps in reducing your enecy cost over 30 + years
2. **ENVIRONMENTAL BENEFITS**
Adopting solar for home or Business helps in reducing carbon emissions
3. **SOLAR BATTERY, DO I NEED ONE**
A Solar Battery will store the energy that solar panels generate. Which means you can time shift your energy production
4. **FINANCING SOLAR**
Upfront is always the best option , However you can get financing on your solar panels like a Bank Loan or a Power Purchase agreement

LUCRATIVE SOLAR PROVIDES A TOTAL END TO END SOLUTION.

REDUCED OPERATING COST
 Solar Power Systems will reduce your bill Energy cost makes up for a significant portion of the running expenses of A commercial establishment. For big and small businesses, this money savings can have a tremendous impact.

Having a solar power system installed is certainly as good as prepaying for almost 40 years of energy, but at just a fraction of what you are currently paying for electricity. The cost per unit of your Current energy costs is likely to be much higher

than what you would spend for solar power. This results in further savings for your business.

MAINTAINANCE FREE & RELIABLE

Once installed, a solar power system will require minimal maintenance. The system will provide clean electricity for 25 to 40 years. Most of the solar panels are backed by a 25-year performance warranty.

IMPORTANT NFORMATION

A 1Kw PV system would generate an average of 3-4units(kWh) perday, 250+ days are consider as sunny day in the UK andHence 1k Wp PV system would generate around 750-1000 units electricity per year. (*solarmodule cleaning twice a month)
 Connectivity charges of DISCOM and DISCOM agreement, Net-meter charge as actual paid by customer
